

Teche Services

Teche provides the IT knowledge and tech support services that enable patients and providers to interact with each other in a virtual environment. Our associates help users set up their devices and resolve any technology-related roadblock.

Teche Services ensure an efficient, safe, and reliable IT environment by providing IT support and technology assistance to your business, and conduct active maintenance, monitoring, and backups remotely using sophisticated medical technology.

Services

Managed IT Services

Comprehensive support, monitoring, and consulting in a simplified model

Server and Network Support

We set up, manage and monitor your core IT infrastructure to keep your business running without interruption

Desktop and User Support
