Our financing model ensures you do not have to block your capital with expensive equipment purchases that soon become obsolete. Instead, with one monthly fee, we give you an optimum technology package, including devices, installation and training at your office, home, and remote locations. Our 24/7 service agents then take care of all the required ongoing upgrades and maintenance, provide technical support, workflow process analysis for optimization, continuing education, and asset and data management.

What We Do

Teche Coding

Hire the best talent on a contractual or project basis

Teche Services

Asset management, ongoing support, operation coordination, billing services

Teche Devices

Hardware system for providers and patients - vital kits, kiosks, hubs, remote home monitoring

Teche APIs

API management, Video Servers, EMR FHIR/HL7 connectors

Why Us

- Lower costs by strategically deploying open source technology
- Scale up or down as per your business needs from a single provider to a complete enterprise setup
- One-stop solution, bringing all your office devices, desktops, servers and storage needs together under one umbrella
- Maximize the technology life cycle with lifetime upgrades and technical support
- Significant savings by bundling hardware, support and life-cycle services- maintenance, configuration, and upgrade options
- Pre-configured/ pre-tested hardware solution ensembles ensure you face no problems with compatibility and upgrades
- Monitor realtime information on the location, profile, and condition of every device
- Manage access and data remotely for your security, and prevent potential HIPAA breaches
